

How to apply

You can access our application form on our website at dsccl.uic.edu. You may also call us at **(800) 322-3722** and our staff can help you complete an application by phone or in person at one of our regional offices. We can even arrange to meet you at your home or another location for your convenience.

We work as quickly as we can to determine how we can help your child. Our goal is to begin making a difference in the life of your family as soon as possible!

Reaching for a future

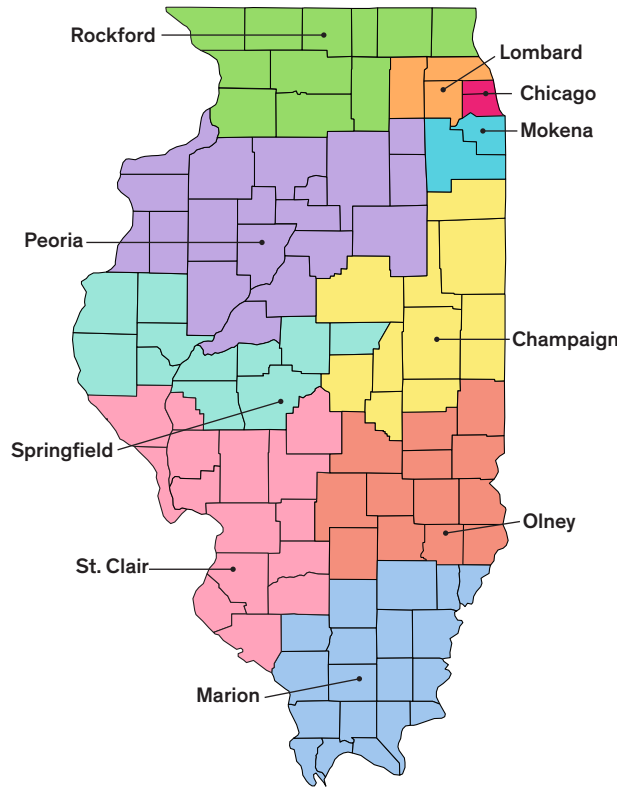

We want to help you and your child prepare for adulthood and the changes this transition will bring in the areas of health care, education, employment, independence and other facets of life. We'll help you:

- Determine a youth's readiness for the transition to adulthood
- Develop a transition plan
- Find information and connect you and your child with programs

We'll help you plan for the future.

Our regional offices serve families in their local communities.

**Not sure who to contact?
We'll get you to the right place.**

Our impact

Our care coordination helps families feel more confident and organized in the care of their child. Your family can develop a stronger partnership with your child's doctors and specialists and stay at the center of decisions about your child's care. Our care coordination can help you navigate the maze of resources and insurance coverage/benefits more effectively. We can also help you and your child achieve their educational and vocational goals.

"(DSCC has) been an emotional shoulder to lean on... They've helped connect us to various grants for funding and have taken pressure off of myself and my husband when it comes to contacting medical facilities and practitioners regarding services and approvals and payment."

– Jessica Lance, parent

Who we help

UIC's Division of Specialized Care for Children (DSCC) is a statewide program that serves Illinois families with children who have or are suspected of having an eligible medical condition. Families who care for children and youth who require in-home shift nursing may also receive support.

How we help

We partner with families, doctors, schools and others to develop a plan of care that addresses a child's medical, social, behavioral, educational and financial needs. This process is called care coordination and is FREE, regardless of a family's income level. Our care coordination can include:

- Accessing diagnostic tests
- Finding specialized medical care
- Explaining insurance coverage/benefits
- Communicating with doctors, specialists and schools
- Helping with transportation for appointments
- Connecting families for parent-to-parent support
- Preparing for the transition to adulthood

We can also help pay for eligible medical expenses, such as equipment, therapies, supplies and medical services, when families meet our income guidelines.

Is my child eligible?

Our eligible medical conditions include, but are not limited to:

- Blood Disorders
- Cardiovascular Impairments
- Craniofacial & External Body Impairments
- Eye Impairments
- Gastrointestinal Impairments
- Hearing Impairments
- Inborn Errors of Metabolism
- Nervous System Impairments
- Orthopedic Impairments
- Pulmonary Impairments
- Urogenital Impairments

If your child's diagnosis is unclear, we can arrange a diagnostic test.

To find out if your child is eligible, call us at **(800) 322-3722**.
