

# Project LEAP

Launching Equity in Access to Preschool

We help children with disabilities from birth to 6 get Early Intervention and early childhood special education services to get them ready to succeed in school!

## Project LEAP can:

- Help your child move from Early Intervention to early childhood education;
- Make sure your child gets the tests she needs to get special education services;
- Help your child get behavior supports and assistive technology;
- Work with your child's doctors to make sure she gets what she needs;
- Go to your child's IEP meetings, mediation, and due process hearings in select cases
